

DPDT Self-locking Micro Push Button Switches

Push Button Series 8.5*8.5 6 Pin Push Switch

Push Button Switch is tact type switch,which also called tact switch.The push button switch is one of the electronics switches that belongs to electronics components;when you use the enough operation force to press the direction of switches operation to finish ON-OFF function,and if you repeal the switch turn to be OFF,so inner structure depends on the change of metal spring stress to achieve ON-OFF.

The structure of push button switch inserts,base,spring,button,cover.

Quick Details

Place of Origin:Dongguan, China (Mainland)

Brand Name:kailh

Model Number:CPG808110D05

Protection Level:IP65

Max. Current:10mA

Max. Voltage:30V

Certificate:CQC/ROSH/SGS/CE

Function:Momentary 1NO

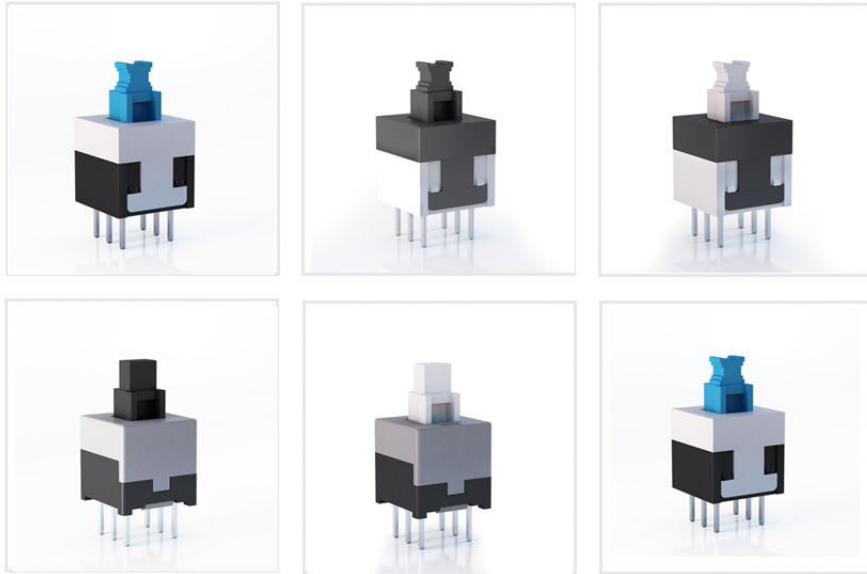

Free Sample:Available

Terminal:PCB or SMD

Packing:Bulk /Reel/Tray/Tube

## Our Services

1. OEM Manufacturing welcome: Our production capacity can be customized for any product.
2. Sample order can be accepted.
3. We will reply you for your inquiry in 24 hours.
4. after sending, we will track the products for you once every three days, until you get the products. When you got the goods, test them, and give me a feedback.If

you have any questions about the problem, contact with us, we will offer the solve way for you

#### Regarding to our products:

More than **2,000** models of switches and sockets.

Monthly production capacity: 50 **million** pieces.

MOQ: 1,000pcs, it's negotiable.

Good quality with competitive price.

We can offer **free** samples with shipping and taxes pay by the buyer.

Various **operation force, height, and color** for your choice.

The discount depends on your order quantity.
